DETAILED ACTION

Specification

1. The abstract of the disclosure is objected to because (1) it exceeds 150 words in length, and (2) the abstract should be limited to a single paragraph.

Correction is required. See MPEP § 608.01(b).

Claim Rejections - 35 USC § 112

2. Claims 1-22 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Regarding claim 1, the "determining if an average buffer fill of the buffer" step seems to be uncorrelated to the steps of (1) calculating a drop probability, (2) comparing the drop, and (3) discarding the packet. The same remark applies to claim 15.

Conclusion

3. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Silberschatz et al. (US 6,556,578); Kalampoukas et al. (US 6,438,101); Choudhury et al. (US 6,092,115) are cited to show approximation of the weighted random early detection buffer admittance algorithm, which is considered pertinent to the claimed invention.
